EVEPURE Ayush Kwath capsules helps to increase passive immunity

Immunity is a state of resistance of an organism to invade biotic or abiotic pathogens and their harmful effects that prevents the development of infection and maintains organism's integrity by counteracting, neutralizing, and clearing pathogens. Two types of immunity exist - Active and Passive: Active immunity occurs when our own immune system is responsible for protecting us from a pathogen. Passive immunity occurs when we are protected from a pathogen by immunity gained from outer source.
